Profile Summary

Aspiring Full-Stack Developer and Cloud Enthusiast with expertise in front-end web technologies and basic knowledge of AWS Cloud. Skilled in building responsive UIs, integrating REST APIs, and working with the MERN stack. Passionate about creating dynamic web applications and eager to expand my skills in full-stack development and cloud solutions.

Technical Skills

Front-End Technologies: HTML, CSS, Bootstrap, Tailwind CSS, JavaScript, React

Back-End Technologies: Node.js, Express.js, MongoDB, Mongoose, REST API

Programming Languages: Python

Cloud Technologies: AWS Cloud (Basics), Cloud Computing, Linux (Basics)

Version Control Tools: Git, GitHub

Projects

Movie Finder

- Developed a movie browsing app using the TMDB API, featuring Now Playing, Popular, and Top Rated movie categories. Integrated secure bearer authentication to ensure safe and authorized data access. Enhanced user interface and experience for seamless navigation and engagement.
- Technologies Used: HTML, Tailwind CSS, Flowbite, JavaScript, React

Git Finder

- Built a Git Finder app using the GitHub API for real-time user validation and public repository fetching. Ensured precise data display and a seamless user experience for efficient profile exploration.
- Technologies Used: HTML, CSS, JavaScript and Bootstrap

Review App

- Developed a review application using React with full CRUD functionality for efficient review management. Implemented a JSON server for storing user reviews, ensuring seamless data handling and user-friendly interaction.
- Technologies Used: HTML, CSS, JavaScript

Money Tracker

- Developed a Money Tracker application with features for adding, editing, and deleting expense items. Integrated real-time total calculation, dynamically updating for accurate financial tracking.
- Technologies Used: HTML, CSS, JavaScript

Certifications
